National PKU Alliance
WWW.NPKUA.ORG
1-877-NPKUA-22

The National PKU Alliance works to improve the lives of individuals and families associated with PKU through research, support, education and advocacy while ultimately seeking a cure.

NORD (National
Organization for Rare
Diseases)
WWW.RAREDISEASES.ORG
1-800-999-6673

The National Organization for Rare Diseases (NORD), Inc.® is a not-for-profit health agency dedicated to the identification, treatment, and cure of rare "orphan diseases" such as PKU through education, advocacy, research and patient services programs.

Indication

KUVAN® (sapropterin dihydrochloride) Tablets is approved to reduce blood Phe levels in patients with hyperphenylalaninemia (HPA) due to tetrahydrobiopterin- (BH4-) responsive Phenylketonuria (PKU). KUVAN is to be used with a Phe-restricted diet.

Important Safety Information

High blood Phe levels are toxic to the brain and can lead to lower intelligence and decrease in the ability to focus, remember and organize information. Any change you make to your diet may impact your blood Phe level. Follow your doctor's instructions carefully. Your doctor and dietitian will continue to monitor your diet and blood Phe levels throughout your treatment with KUVAN.

If you have a fever, or if you are sick, your Phe level may go up. Tell your doctor and dietitian as soon as possible so they can see if they have to adjust your treatment to help keep your blood Phe levels in the desired range.

KUVAN is a prescription medicine and should not be taken by people who are allergic to any of its ingredients. Tell your doctor if you have ever had liver or kidney problems, are nursing or pregnant or may become pregnant, have poor nutrition or are anorexic. Your doctor will decide if KUVAN is right for you. Tell your doctor about all the medicines you take.

The most common side effects reported when using KUVAN are headache, diarrhea, abdominal pain, upper respiratory tract infection (like a cold), throat pain, vomiting, and nausea.

To report SUSPECTED ADVERSE REACTIONS, contact BioMarin Pharmaceutical Inc. at 1-866-906-6100, or FDA at 1-800-FDA-1088 or www.fda.gov/medwatch.

Please read the attached Patient Information.

You're invited

PKU

Town Hall MEETING

YOU are Invited!

Please join us for an exciting event designed to provide people with PKU and their families an opportunity to

- Discuss the importance of managing your PKU and the impact it has on your daily life
- Learn about KUVAN® (*sapropterin dihydrochloride*) Tablets and support services available to help you with your treatment
- Meet other people with PKU and their families
- Ask your PKU questions of local healthcare professionals and people just like YOU
